

White Points System - Dubai

In 2012, Dubai Police introduced the White Points System to motivate and reward drivers who adhere to traffic laws in the emirate. This system grants white points annually to drivers who commit no traffic violations, allowing them to carry forward these points to the following year and benefit in various ways.

Eligibility Criteria:

The White Points System rewards compliant drivers with Dubai-issued driving licenses if they meet the following conditions:

1. No recorded traffic violations on the driver's license file or the registered vehicle file throughout the calendar year.
2. No Salik violations or traffic violations for the vehicle or driver in other emirates.
3. No traffic-related cases against the vehicle or its driver.

Points Accumulation:

- Drivers earn two points at the end of each month, totaling 24 points per calendar year.

Conditions for Forfeiture:

- If a traffic violation is committed during the year, the driver and vehicle owner lose all white points for that year, regardless of whether the violation was committed by the owner or another driver.

Benefits of White Points:

Drivers who comply with traffic laws and accumulate white points can avail of one of the following benefits, once a year:

1. Exchange white points for black points - up to a maximum of 12 black points in one instance.

2. Waive the vehicle impoundment period - for up to 30 days.
3. Cancel one traffic fine - provided it does not include black points or a vehicle impoundment period.
