

Dubai Traffic Violations: Black Points System and Speed Limits

Violations and Black Points System in Dubai:

- Using a mobile phone while driving: 20 black points.
- Not wearing a seatbelt: 4 black points.
- Violations related to running a red light or illegal overtaking: Black points range from 4 to 8, depending on the specific violation.

If a driver accumulates 24 black points within a 12-month period, the driving license will be suspended for 3 months. Upon exceeding 24 points again, the suspension period increases to 6 months. For a third offense exceeding the limit, the driver's license will be revoked, and the individual must undergo training and pass new tests to regain their license.

The Black Points System aims to promote traffic awareness and road safety. Drivers are advised to avoid traffic violations to prevent accumulating black points against their licenses.

Speed Limits in Dubai:

Speed limits in Dubai vary depending on the type of road and the area. Here are some common speed limits:

- City roads and residential areas: The maximum speed limit is usually 60 km/h or 80 km/h, but in some areas, it may be as low as 40 km/h.
- Main highways: The maximum speed limit is typically 100 km/h, with some highways allowing speeds up to 120 km/h.

- Express highways (autostrades): Speed limits generally range between 120 km/h and 140 km/h.

Drivers should always pay attention to traffic signs and speed limit boards, as temporary changes and restrictions may apply based on local traffic authority instructions.
